## SECTION II – RISK FACTORS

*An investment in equity shares involves a high degree of risk. You should carefully consider each of the following risk factors and all other information set forth in this Letter of Offer, including the risks and uncertainties described below, before making an investment in the Equity Shares. This section should be read together with the Financial Statements and other financial information included elsewhere in this Letter of Offer.*

*The risks and uncertainties described below are not the only risks that we currently face. Additional risks and uncertainties not presently known to us, or that we currently believe to be immaterial, may also adversely affect our business, prospects, financial condition and results of operations and cash flow. If any or some combination of the following risks, or other risks that are not currently known or believed to be material, actually occur, our business, financial condition and results of operations and cash flow could suffer, the trading price of, and the value of your investment in, Equity Shares could decline and you may lose all or part of your investment. In making an investment decision you must rely on your own examination of us and the terms of this Issue, including the merits and risks involved.*

*This Letter of Offer also contains forward-looking statements that involve risks and uncertainties. Our results could differ materially from such forward-looking statements as a result of certain factors including the considerations described below and elsewhere in this Letter of Offer.*

*Unless otherwise stated, references to “we”, “us”, “our”, “our Company” and similar terms is for Nagreeka Exports Limited.*

***1. Any increase in the prices of raw material or any decrease in the supply of raw materials, primarily cotton will materially and adversely affect our business, results of operations and financial condition.***

The primary raw material for our manufacturing operations is cotton. We purchase cotton from domestic market. Being an agricultural commodity, there are fluctuations in price of cotton due to the changes in weather condition among other factors. Further, the minimum support price for cotton is also determined by the Government of India. As a result, the cotton price in India is not only driven by market demand but also supported by minimum support price operations of the Cotton Corporation of India. Any increase in cotton prices may have an adverse effect on our business, financial condition and results of operations. Any material shortage or interruption in the domestic supply or deterioration in quality of cotton due to natural causes or other factors could result in increased costs that we may not be able to pass on to customers.

We buy cotton from open market, therefore, there is no minimum committed volumes of raw material that our suppliers assure. Any failure to arrange for raw material in the necessary quantities or as per our requirement with respect to our schedule, quality, standards and specifications, may adversely affect our production processes, which may in turn result in a material adverse effect on our business, financial condition and results of operations. Although we have not encountered any significant disruptions in the sourcing and/or supply of our raw materials, we cannot assure you that such disruptions will not occur and/or we shall continue to be able to source raw materials in a cost-effective manner.

We sell our products in highly competitive markets, and competition in these markets is based primarily on demand and price. However, competition in our businesses can be based on, among other things, innovation, perceived value, brand recognition, promotional activities, advertising, new product introductions and other activities. It is difficult for us to predict the timing and scale of our competitors' actions in these areas. As a result, to remain competitive, we must continuously strive to reduce our production costs and improve our operating efficiencies. In our businesses, we actively compete with companies producing the same or similar products. Due to the nature of our products, competition in these markets is based primarily on price and quality.

***2. We do not have long term contracts with our customers.***

We have not executed any long-term contracts with our domestic or international customers. Our sales are based on purchase orders that are placed by our customers depending on their requirements, with typical delivery periods ranging from 15 days to 180 days. In the absence of long-term contracts, there can be no assurance that a particular

customer would continue to source their supplies from us in the future. A reduction in the purchase orders placed by the customers may adversely affect our business and revenues; and may require us to shift to different markets and/or look for alternative buyers. Further, any loss of our major customers arising out of competition or from cheaper sources can lead to reduced margins and our results and operations may be affected.

**3. *Our promoter Sushil Patwari is involved in certain regulatory proceedings and levied with penalty by SEBI. Any adverse outcome in such proceedings may have implications on smooth functioning of our Company.***

SEBI vide its order dated August 25, 2023 (“**Order**”), has imposed penalty of ₹10.00 lakh on our Promoter Sushil Patwari in the matter of Rupa Company Limited (“**RCL**”). SEBI has alleged that our Promoter, Sushil Patwari had traded in the securities of RCL during the period February 1, 2021 to June 30, 2021 on the basis of unpublished price sensitive information and in contravention of the provisions of the Securities and Exchange Board of India Act, 1992 read with the SEBI PIT Regulations. Sushil Patwari has challenged the Order before the Securities and Appellate Tribunal (“**SAT**”) after making payment of ₹10.00 lakh. The matter is currently pending before SAT. However, we cannot assure that the said challenge will be successful and any adverse order or unfavourable order in the appellate forum may adversely affect our Promoter, the Company and its reputation.

**4. *We are exposed to foreign exchange fluctuations risks.***

We are exposed to foreign exchange related risks since a major portion of our revenue from operations are in foreign currency. Our revenue from operations in foreign currency in Fiscal 2023, accounted for approximately 49.23% of our total revenue from operations for the respective periods.

Any fluctuation of rupee rate against foreign currencies may adversely affect our export earnings, which we have experienced and can be expected to continue in terms of foreign exchange losses in respect of transactions denominated in foreign currencies

We have been hedging our foreign exchange exposure through forward contracts to mitigate the risk of fluctuations in foreign exchange currencies for exports of our products. Although we have been entering into foreign exchange forward contracts to hedge against our foreign exchange risks, we cannot assure that we will continue to enter into forward contracts in the future and any such lack of hedging may expose us to foreign exchange currencies fluctuation, which may have an adverse impact on our business, results of operations and financial conditions.

**5. *Any decrease in demand for our products may adversely affect our business and financial condition.***

The sales of our yarn that we manufacture and trade, rely heavily on the demand and preferences of end-user consumers of garments and other textile products. Our largest business segment is the manufacturing of yarn which accounted for approximately 56.46% and of our total revenue from operations for Fiscal 2023. If the preferences of end-users for textile products undergo a change which is driven by fashion or, availability of cheaper alternative like polyester or if our industry experience lower or negative growth, demand for our products may decrease and our revenue from sales of such products may decline, which may in turn materially adversely affect our business, financial condition and results of operations. In addition, we make significant decisions, including setting up of additional capacities, determining the levels of business that we will seek and accept, production schedules, raw material procurement, personnel requirements, and other resource requirements, based on our estimates of future sales projections. This may require us to increase staffing, increase borrowings and incur other expenses to meet the anticipated demand. However, any decrease in the demand for our product may result in such expenses causing reductions in our margins and significantly impact our results and operations. We cannot assure you that we will be able to realise the sales value on the basis of our estimates and any such losses may have an adverse impact on our results of operations.

**6. *Our failure to accurately forecast and manage inventory could result in an unexpected shortfall and/or surplus of products, which could have a material adverse impact on our profitability.***

We monitor our inventory levels based on our projections of future demand. Because of the length of time necessary to produce commercial quantities of our products, we make production decisions well in advance of sales for some of our products. An inaccurate forecast of demand for any product may result in unavailability/surplus of products. This

unavailability of products in high demand may depress sales volumes and adversely affect customer relationships. Conversely, an inaccurate forecast can also result in an over-supply of products, which may increase costs, negatively impact cash flow, reduce the quality of inventory, erode margins substantially due to writing down of inventory cost from its carrying value to the net realisable value. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition.

**7. *Our indebtedness, including various conditions and restrictions imposed on us by our financing agreements, could adversely affect our ability to react to changes in our business, and we may be limited in our ability to use debt to fund future capital needs.***

As of September 30, 2023, our borrowings amounted to ₹ 19,955.42 lakh. Our substantial indebtedness could:

- require us to dedicate a substantial portion of our cash flow from operations to payments in respect of our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures and other general corporate expenditures;
- increase our vulnerability to adverse general economic or industry conditions;
- limit our flexibility in planning for, or reacting to, competition and/or changes in our business or our industry;
- limit our ability to borrow additional funds;
- restrict us from making strategic acquisitions, introducing new products or services or exploiting business opportunities; and
- place us at a competitive disadvantage relative to competitors that have less debt or greater financial resources.

We cannot guarantee that we will be able to generate enough cash flow from operations or that we will be able to obtain enough capital to service our debt or fund our planned capital expenditures. In addition, adverse changes in the business conditions affecting us could cause the amount of refinancing proceeds to be insufficient to meet our interest payments or fully repay any existing debt upon maturity and we may be unable to fund the payment of such shortfalls. If we cannot obtain alternative sources of financing or our costs of borrowings become significantly more expensive, then our financial condition and results of operations will be adversely affected.

Moreover, the agreements governing certain of our debt obligations include terms that, in addition to certain financial covenants, which, amongst others, restrict our ability to make capital expenditures and investments, declare dividends, effect a scheme of amalgamation or reconstitution, alter our constitutional documents, undertake new projects, change our management and board of directors, modify our promoter/ promoter group shareholding, and modify our capital structure. Any failure on our part to comply with these terms in our loan agreements would generally result in events of default under these loan agreements. In such a case, the lenders under each of these respective loan agreements may, at their discretion, accelerate payment and declare the entire outstanding amounts under these loans due and payable, and in certain instances, enforce their security which has been constituted over various assets and take possession of those assets, which could adversely affect our liquidity and materially and adversely affect our business and operations. In addition, to the extent that we cannot make payments on accelerated amounts, such non-payment could result in the cross default and/or cross-acceleration of some or all our other outstanding indebtedness, and payment of penalty interest, which could likewise adversely affect our liquidity and materially and adversely affect our business, operations and financial conditions.

**8. *We are subject to government policies and regulations affecting the agricultural sector particularly related to cotton and related industries could adversely affect our operations and profitability.***

Production of cotton, our primary raw material for our operations is significantly affected by government policies and regulations. Governmental policies affecting the agricultural industry (such as taxes, tariffs, duties, subsidies and import and export restrictions on agricultural commodities and commodity products) can influence industry profitability, the planting of certain crops versus other uses of agricultural resources, the location and size of crop production, whether unprocessed or processed commodity products are traded and the volume and types of imports and exports. In addition, international trade disputes can adversely affect agricultural commodity trade flows by limiting or disrupting trade between countries or regions. In recent years, rising prices of cotton and concerns about food security have prompted governments in several countries to introduce export bans on key agricultural commodities and commodity products. There is no assurance that such export bans may not become more prevalent

whether across countries or products. Future government policies may adversely affect the supply, demand for and prices of our products restrict our ability to do business in our existing and target markets and could cause our financial results to suffer.

**9. Any inability on our part to comply with prescribed technical specifications and standards of quality in connection with our products could adversely impact our operations and profitability.**

Our business requires obtaining and maintaining quality certifications and accreditations from independent certification entities as well as some of our customers that enable us to be eligible to participate in orders. Further, we are required to adhere to stringent contractual technical specifications and standards, and our customers may require our manufacturing facilities and products to be pre-approved and/or accredited by various agencies before placing orders for our products. If we fail to adhere to the aforesaid requirements or changes thereto in a timely manner, or at all, our cash flows, operations and/or profitability could be adversely affected. Our top customers may vary from period to period depending on order bookings. Our business and results of operations will be adversely affected if we are unable to develop and maintain a continuing relationship or pre-qualified status with our key customers.

**10. Our operations are subject to high working capital finance requirements. Our inability to obtain and/or maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet our requirement of working capital or pay our debts, could adversely affect our operations, financial condition and profitability.**

We require substantial amounts of working capital for our business operations, and the failure to obtain required working capital on attractive terms or at all, may materially and adversely affect our growth prospects and future profitability. We require substantial capital to maintain and operate our production facilities.

Our total working capital debt (including bills discounting) as of September 30, 2023, amounting to ₹ 15,125.45 lakh. We rely on debt financing to meet our working capital requirements. We cannot assure that we will be able to raise additional debt in a timely manner or on acceptable terms in the future to finance our working capital, and this may materially and adversely affect our business.

**11. Our inability to successfully implement our strategies could adversely affect our growth and future profitability.**

Our ability to successfully implement our strategies of enhancement of health and hygiene division and other value-added products, expanding our sales to other countries and increasing our production capacity are subject to variety of risks, including delay in commissioning, unanticipated cost increases, non-availability of adequate funds, the required personnel and other risks. Further, there can be no assurance that these strategies will be completed in a timely manner or at the cost levels anticipated by our Company.

. In the event our Company is unable to successfully execute the aforesaid strategies, the benefits expected upon its implementation, our profitability, financial condition, and results of operations expected from growth could be materially adversely affected.

**12. Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised and may be subject to change based on various factors, some of which are beyond our control.**

Our Company proposes to utilize the Net Proceeds for the Issue towards repayment of loans and general corporate purpose. Our funding requirements and deployment of the Net Proceeds are based on internal management estimates based on current market conditions, and have not been appraised by any bank or financial institution or other independent agency. Further, in the absence of such independent appraisal, our funding requirements may be subject to change based on various factors which are beyond our control. For details, see “*Objects of the Issue*” on page 40. In addition, we cannot assure you that use of the Net Proceeds to meet our future capital requirements, fund our growth and for other purposes identified by our management would result in actual growth of our business, increased profitability, or an increase in the value of our business and your investment.

***13. Any prolonged business interruption at our manufacturing facilities could have a material adverse effect on the results of our operations and profitability.***

Any material interruption at our manufacturing facilities, including but not limited to power failure, fire and unexpected mechanical failure of equipment's and labour unrest could reduce our ability to meet the conditions of our contracts and earnings for the affected period. Irregular or any interruption in supply of power including from our captive windmills or water are factors that could adversely affect our daily operations. If there is an insufficient supply of electricity or water to satisfy our requirements, we may need to limit or delay our production, which could adversely affect our business, financial condition, and results of operations. We cannot assure you that we will always have access to sufficient supplies of electricity in the future to accommodate our production requirements and planned growth. Similarly, there is no assurance that those of our manufacturing facilities unaffected by an interruption will have the capacity to increase their output to manufacture products for the affected manufacturing facilities, to the extent that all outstanding orders will be fulfilled in a timely manner. In the event of prolonged interruptions in the operations of our manufacturing facilities, we may have to procure various supplies and products to meet our production requirements, which could affect our profitability.

***14. Export destination countries may impose varying duties on yarn or enter into free trade agreements with countries other than India. Any increase in such duties or the entry into free trade agreements with countries other than India may materially adversely affect our business, financial condition, and results of operations.***

Our revenues from exports amounted to ₹18,801.83 lakh and ₹16,282.74 lakh in Fiscal 2023 and for the six months period ended September 30, 2023, which represented approximately 49.23% and 60.80% of our revenues from operations for the respective periods. The destination countries impose varying duties on our products. There can be no assurance that the duties imposed by such destination countries will not increase. Any change or increase in such duties may adversely affect our business, financial condition, and results of operations. Export destination countries may also enter into free trade agreements or regional trade agreements with countries other than India. Such agreements may place us at a competitive disadvantage compared to manufacturers in other countries and may adversely affect our business, financial condition, and results of operations. Further, adverse changes in import policies in countries to which we export our products may have a particularly significant adverse impact on our business, financial condition, and results of operations.

***15. We operate in a competitive business environment. Competition from existing players and new entrants and consequent pricing pressures could have a material adverse effect on our business growth and prospects, financial condition, and results of operations.***

We face huge competition in our industry from the existing players and new entrants especially producers of man-made fibre, which is a cheaper alternative to the natural fibre we use. If there is a change in trend and increase in demand of man-made fibre may put pressures on pricing, product quality, turnaround time, order size etc., which may put strain on our profit margins. Failure to compete with producers of man-made fibre may have adverse effect on our business, financial condition, and results of operations.

***16. We are dependent on third party transportation providers for the supply of raw materials and delivery of our products.***

As a manufacturing business, our success depends on the smooth supply and transportation of the various raw materials required at our manufacturing units and of our products from manufacturing units to our customers, both of which are subject to various uncertainties and risks. We use third party transportation providers for the supply of most of our raw materials and delivery of our products to domestic and overseas customers. Transportation strikes have had in the past, and could again have in the future, an adverse effect on supplies and deliveries to and from our customers and suppliers. In addition, raw materials, and products maybe lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of raw materials and products which may also affect our business and results of operation negatively. Failure to maintain a continuous supply of raw materials or to deliver our products to our customers in an efficient and reliable manner could have a material and adverse effect on our business, financial condition, and results of operations.

***17. We introduce new value-added products for our customers and there is no assurance that our new products will be profitable in the future. Further, we face additional risks as we expand our product offerings and grow our business.***

In order to continue to expand our businesses and profitability, we introduce new value added products in our existing lines of business. Failure to consider, identify and provide for all additional risks may result in an adverse financial impact on us. Such new products would result in incurring additional costs and we cannot guarantee that such new products will be successful once offered, whether due to factors within or outside of our control, such as general economic conditions, a failure to obtain sufficient financing to support or a failure to understand customer demand and market requirements. If we are unable to achieve the intended results with respect to our offering of new products, or manage the growth of our business, our financial condition, cash flows, results of operations and prospects could be materially adversely affected.

***18. Inconsistent product quality could lead to customer dissatisfaction, hampering reputation, sales and business which may materially and adversely affect our business and prospects.***

We face business risks relating to our products not meeting the customer's technical specifications or the required quality standards. Some of our manufacturing products i.e., yarns accredited with Certified Organic Cotton and BCI certifications etc. We have prescribed stringent quality checks and continue to improve its resource utilization and minimize in-process rejections by leveraging quality tests across all manufacturing facilities. We are focused on improving quality systems and their effectiveness to lessen the incidence of such risks and simultaneously improving its operational efficiencies. However, there can be no assurance that there could not still be some deviation from prescribed quality standards due to factors such as human error. Despite putting in place strict quality control procedures we cannot assure that our products will always be able to satisfy our clients/customer's quality standards. Any negative publicity regarding our Company, or products, including those arising from any deterioration in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation and our operations. Introduction of new products or for any other reason, any failure on our part to meet our customers' expectation could adversely affect our business, result of operations and financial condition. Such risks may be controlled, but not eliminated, by adherence to good manufacturing practices and finished product testing. We have little, if any, control over proper handling once our products are delivered to our customers. In case our products do not meet the customer, requirements or fails to adhere to the technical specifications or quality standards, our customers may cancel the order. Any such cancellation by our customers may adversely affect our reputation and brand image, which could adversely affect our business, results of operations and financial condition.

***19. We are subject to strict quality requirements, and any failure to comply with quality standards may lead to the cancellation of existing and future orders and could negatively impact our business, financial condition, results of operations and prospects.***

Our customers maintain strict quality and certification procedures. Our products go through various quality checks at various stages. Our quality policy is focused on fulfilling customer requirements through reliable products and services aimed at meeting all regulatory requirements and through continual improvement of our quality management systems. Our products undergo a qualification process throughout the entire value chain to ensure that quality products are being provided to customers. Our quality control programs and business management systems at our manufacturing facilities include ISO 9001-2015 certification and

Despite strict adherence to quality control programs and business management systems, we cannot assure you that our quality control processes will not fail, or the quality tests and inspections conducted by us will be accurate at all times. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality assurance procedures, negligence, and human error or otherwise, may damage our products and result in deficient products. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs in defending such claims

**20. *We are dependent on our senior management and other key personnel as well as certain intermediaries, and the loss of, or our inability to attract or retain, such persons could adversely affect our business, results of operations, financial condition, and cash flows.***

Our performance depends largely on the efforts and abilities of our senior management and other key personnel. We believe that the inputs and experience of our senior management in particular, and other key personnel are valuable for the development of our business and operations and the strategic directions taken by our Company. For further information of our key management personnel, see “*Our Management and Organisational Structure*” on page 69. There can be no assurance that these individuals or any other member of our senior management team will not leave us or join a competitor or that we will be able to retain such personnel or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an adverse effect on our business, results of operations, financial condition, and cash flows.

**21. *We require various licences and approvals for undertaking our business and if we fail to obtain, maintain, or renew our statutory and regulatory licenses, permits and approvals required to operate our business, our business and results of operations may be adversely affected.***

Our operations are subject to government regulations, and we are required to obtain and maintain several statutory and regulatory permits, approvals, and consents under central, state, and local government rules in India, generally for carrying out our business and for each of our manufacturing facilities. The introduction of additional government control or newly implemented laws and regulations, depending on the nature and extent thereof and our ability to make corresponding adjustments, may adversely affect our business, results of operations and financial condition. In particular, decisions taken by regulators concerning economic policies or goals that are inconsistent with our interests could adversely affect our results of operations. These laws and regulations and the way in which they are implemented and enforced may change from time to time and there can be no assurance that future legislative or regulatory changes will not have an adverse effect on our business, financial condition, cash flows and results of operations.

Further, certain approvals for our manufacturing facilities are required to be applied or renewed on an ongoing basis. The approvals required by us are subject to numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged noncompliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business. In case we fail to comply with these requirements, or a regulator alleges we have not complied with these requirements, we may be subject to penalties and compounding proceedings.

**22. *We have in the past entered related party transactions and may continue to do so in the future. There can be no assurance that we could not have achieved more favourable terms if such transactions had been entered into with third parties.***

We have entered transactions with related parties. While we believe that all such transactions have been conducted on an arms-length basis, there can be no assurance that we would not have achieved more favourable commercial terms with other parties. Furthermore, we may enter related party transactions in the future, and such transactions may potentially involve conflicts of interest. For further information on our related party transactions, see “*Financial Information*” on page 70. There can be no assurance that such transactions, individually or in the aggregate, will always be in the best interests of our minority shareholders and will not have an adverse effect on our business, results of operations, financial condition, and cash flows. In the event any conflict of interest arises between us, or to the extent that competing products offered by any of our related parties erode our market share, we may not be able to effectively manage any such conflict or competitive pressures and, consequently, our business, results of operation and financial condition may be adversely affected.

**23. *If we are unable to successfully execute our growth strategies, our business prospects, and results of operations could be materially and adversely affected.***

We propose to expand our business by adopting a series of strategies. For further details, see “*Our Business – Our Strategy*” on page 60. Our growth depends on our ability to expand our market share and our inability to do so may adversely affect our growth prospects. Our growth strategies could place significant demand on our management and our administrative, operational, and financial infrastructure. We could also encounter difficulties and delays in executing our growth strategies due to several factors, including, without limitation, delays in implementation, lack of appropriate infrastructure, unavailability of human and capital resources, or any other risks that we may or may not have foreseen. Our management may also change its view on the desirability of current strategies, and any resultant change in our strategies could put significant strain on our resources. Further, we may be unable to achieve any synergies or successfully integrate any acquired business into our portfolio. Any business that we acquire may subject us to additional liabilities, including unknown or contingent liabilities, liabilities for failure to comply with laws and regulations, and we may become liable for the past activities of such businesses.

**24. *If we are unable to collect our dues and receivables from our customers, our results of operations and cash flows could be materially and adversely affected.***

Our business depends on our ability to successfully obtain payment from our customers of the amount they owe us for the products delivered in timely manner. Our Company generally extends the benefit of a credit period of up to 180 days to its customers, however, the same is not uniform and it varies on a case-to-case basis. Our average credit cycle has been 20 days and 15 days in Fiscal 2023 and in the six months period ended September 30, 2023, respectively.

We cannot assure you that we will be able to accurately assess the creditworthiness of our customers. Macroeconomic conditions could also result in financial difficulties for our customers, including limited access to the credit markets, insolvency, or bankruptcy. Such conditions could cause customers to delay payment, request modifications of their payment terms, or default on their payment obligations to us, cause us to enter into litigation for non-payment, all of which could increase our receivables. If we are unable to meet our contractual obligations, we might experience delays in the collection of, or be unable to collect, our customer balances, and if this occurs, our results of operations and cash flows could be adversely affected. In addition, if we experience delays in billing and collection for our products, our cash flows could be adversely affected. Any significant decrease in or discontinuation of products manufactured from our products by customers in the industry or other industries from which we derive significant revenues in the future may reduce the demand for our products.

**25. *We have contingent liabilities, and our financial condition could be adversely affected if any of these contingent liabilities materializes.***

As of March 31, 2023, contingent liabilities disclosed in the notes to our Audited Financial Statements aggregated ₹7,635.80 lakhs. Our contingent liabilities that had not been provided for as on March 31, 2023 are set forth below:

In the event that any of these contingent liabilities materialize, our financial condition may be adversely affected.

**26. We may face a risk on account of not meeting our export obligations. Our failure to fulfil these export obligations in full may make us liable to pay duty proportionate to unfulfilled obligation along with the interest.**

We have obtained licenses under Export Promotion Capital Goods Scheme (“EPCG”) for import of capital goods without payment of duty and GST; and under Advance Authorisation Scheme for import of inputs without payment of duty and / or GST. As per the licensing requirement under the said scheme, we are required to export goods of a definite amount, failing which we will have to make payment to the Government of India equivalent to the duty saved by us along with the interest. Though in the past we have not been penalised for non-fulfilment of the export obligations under the EPCG Scheme; there can be no assurance that we would be able to meet the export obligations in the future. In case we fail to fulfil these export obligations in full; we will have to pay duty proportionate to unfulfilled obligation along with the interest.

**27. We are subject to stringent labour laws of India. Any strike, labour unrest, work stoppage or increased wage demand by our employees or any other kind of disputes with our employees could adversely affect our business, financial condition, results of operations and cash flows.**

Our manufacturing activities are labour intensive, require our management to undertake significant labour interface, and expose us to the risk of industrial action. As on September 30, 2023 we have about 800 skilled and unskilled employees.

Our dependence on contract labour may result in significant risks for our operations, relating to the availability and skill of such contract labourers, as well as contingencies affecting availability of such contract labour during peak periods in labour intensive sectors such as ours. There can be no assurance that we will have adequate access to skilled and unskilled workmen at reasonable rates. We are also subject to a number of stringent labour laws of India that protect the interests of workers, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes financial obligations on employers upon retrenchment. There can be no assurance that we will not experience disruptions to our operations due to disputes or other problems with our work force such as strikes, labour unrests, work stoppages or increased wage demands, which may adversely affect our business.

If labour laws of India where-in we have manufacturing units become more stringent or are more strictly enforced, it may become difficult for us to maintain flexible human resource policies, discharge employees or downsize, any of which could have an adverse effect on our business, financial condition, results of operations and cash flows. We also enter into contracts with independent contractors who, in turn, engage on-site contract labour to perform certain operations. Although we generally do not engage such labour directly, it is possible under Indian law that we may be held responsible for wage payments to the labour engaged by contractors should the contractor’s default on wage payments. Any requirement to fund such payments will adversely affect us, our business, financial condition, results of operations and cash flows. Furthermore, under the Contract Labour (Regulation and Abolition) Act, 1970, we may be required to absorb a portion of such contract labour as permanent employees. Any order from a regulatory body or court requiring us to absorb such contract labour may have an adverse effect on our business, financial condition, results of operations and cash flows. We are subject to stringent labour laws of India and other jurisdictions and also to other industry standards and any strike, labour unrest, work stoppage or increased wage demand by our employees or any other kind of disputes with our employees could adversely affect our business, financial condition, results of operations and cash flows.

**28. We are subject to export and import controls that could adversely impact our business.**

We are subject to export and import control laws that limit us to where and to whom we can sell our products which could result in postponements or cancellations of product orders. In addition, various countries have enacted laws that could limit our ability to distribute our products or could limit our customers' ability to implement our products in those countries. Changes in our products or changes in export and import regulations may create delays in the introduction of our products in international markets, prevent our customers with international operations from deploying our products throughout their global systems or, in some cases, prevent the export or import of our products to certain countries altogether. Any change in export or import regulations or related legislation, shift in approach to the enforcement or scope of existing regulations, or change in the countries, persons or technologies targeted by such regulations, could result in decreased use of our products by, or in our decreased ability to export or sell our products to, existing or potential customers with international operations. Delays caused by our compliance with regulatory requirements in obtaining or maintaining any regulatory approvals that may, in the future, be required to operate our business could materially affect our business and operating results. We may also be unable to secure raw materials components or software for our capital equipment due to export control laws, as a result of which, our supply chain may be disrupted and we may be unable to provide our products to customers, which can result in a loss of business for us.

***29. Our operations could be adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.***

As of September 30, 2023, we employed about 800 personnel across our operations. Although we have not experienced any material labour unrest in the past, we cannot assure you that we will not experience disruptions in work due to disputes or other problems with our work force, which may adversely affect our ability to continue our business operations. Any labour unrest directed against us, could directly or indirectly prevent, or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. These actions are impossible for us to predict or control and any such event could adversely affect our business, results of operations and financial condition.

***30. Our insurance coverage may not adequately protect us against all losses or the insurance cover may not be available for all the losses as per the insurance policy, which could adversely affect business, financial condition and results of operations.***

Our operations are subject to various risks inherent in the manufacturing industry including defects failures of manufacturing equipment, fire, riots, strikes, explosions, accidents and natural disasters. We maintain an insurance policy that insures against material damage to buildings, facilities and machinery, furniture, fixtures, fittings, stocks, and machinery breakdown. Our key insurance policies consist of industrial all risk policy, sookshma udyam suraksha policy, workmen compensation policy and marine insurance policy.

While we believe that the insurance coverage which we maintain would be reasonably adequate to cover the normal risks associated with the operation of our business, we cannot assure you that any claim under the insurance policies maintained by us will be honored fully, in part or on time, or that we have taken out sufficient insurance to cover all our losses. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance, exceeds our insurance coverage where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected.

***31. Our Company's ability to pay dividends in the future will depend on future earnings, financial condition, cash flows, working capital requirements and required or planned capital expenditures and terms of its financing arrangements.***

Our Company did not pay dividend to our shareholders for the Fiscal 2023. Our ability to pay dividends in future will depend on the earnings, financial condition, and capital requirements of our Company. Our business is capital intensive as we are required to innovate from time to time to increase margins, which may require us to invest all, or part of the profits generated by our business operations. Further, we may not be able to distribute dividends in certain circumstances such as default in payment of interest and/or principal, amongst others, based on certain of our high-

cost financing arrangements. Our Company may be unable to pay dividends in the near or medium-term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our projects, financial condition, and results of operations. Any inability to pay dividends in the future may adversely affect the trading price of the Equity Shares of our Company. For further details, please see “*Financial Information*” on page 70.

***32. Compliance with, and changes in, environmental, health and safety laws and regulations or stringent enforcement of existing environmental, health and safety laws and regulations may result in increased liabilities and increased capital expenditures may adversely affect our cash flows, business results of operations and financial condition.***

Our operations are subject to environmental, health and safety and other regulatory and/ or statutory requirements in the jurisdictions in which we operate. We are accordingly subject to various national, state, municipal and local laws and regulations concerning environmental protection in India. We cannot assure you that compliance with such laws and regulations will not result in a material increase in our costs or otherwise have an adverse effect on our financial condition, cash flows and results of operations. Further, manufacturing activities in India are also subject to various health and safety laws and regulations as well as laws and regulations governing their relationship with their respective employees in areas such as minimum wages, maximum working hours, overtime, working conditions, hiring, and terminating employees and work permits. Accidents, in particular fatalities, may have an adverse impact on our reputation and may result in fines and/or investigations by public authorities as well as litigation from injured workers or their dependents.

Non-compliance with these laws and regulations could expose us to civil penalties, criminal actions, and revocation of key business licences. Environmental laws and regulations in India are becoming more stringent, and the scope and extent of new environmental regulations, including their effect on our operations, cannot be predicted with any certainty. In case of any change in environmental or pollution regulations, we may be required to invest in, among other things, environmental monitoring, pollution control equipment, and emissions management. As a consequence of unanticipated regulatory or other developments, future environmental and regulatory related expenditures may vary substantially from those currently anticipated. We cannot assure you that our costs of complying with current and future environmental laws and other regulations will not adversely affect our business, results of operations or financial condition.

***34. The deployment of funds raised through this Issue shall not be subject to monitoring by any monitoring agency and shall be purely dependent on the discretion of the management of our Company.***

Since the size of the Issue is less than ₹ 10,000 lakh, no monitoring agency is required to be appointed by our Company to oversee the deployment of funds raised through this Issue. The deployment of funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. The Board of Directors of our Company through Audit Committee will

monitor the utilization of the Issue proceeds. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our business and financial condition.

## **EXTERNAL RISK FACTORS**

### ***35. Our business is affected by prevailing economic, political, and other prevailing conditions in India and the markets we currently service.***

Our results of operations and financial condition depend significantly on prevailing economic conditions in India and our results of operations are affected by factors influencing the Indian economy. Various factors may lead to a slowdown in the Indian economy, which in turn may adversely impact our business, prospects, financial performance, and operations. In the past, the Indian economy has been affected by global economic uncertainties, liquidity crisis, domestic policies, global political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, volatility in inflation rates and various other factors. Accordingly, high rates of inflation in India could increase our employee costs and decrease our operating margins, which could have an adverse effect on our results of operations. Any slowdown in the economy of the markets in which we operate may adversely affect our business and financial performance of our business and operation.

### ***36. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our business.***

There could be a downgrade of India's sovereign debt rating due to various factors, including changes in tax or fiscal policy, or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India, which may cause fluctuations in the prices of our Equity Shares. This could have an adverse effect on our business and financial performance, and ability to obtain financing for expenditures.

### ***37. Terrorist attacks, civil disturbances, regional conflicts, and other acts of violence in India and abroad may disrupt or otherwise adversely affect the Indian economy, the health of which our business depends on.***

India has from time to time experienced social and civil unrest and terrorist attacks. These events could lead to political or economic instability in India. Events of this nature in the future could have a material adverse effect on our ability to develop our business. As a result, our business, results of operations and financial condition may be adversely affected. India has also experienced social unrest, Naxalite violence and communal disturbances in some parts of the country. If such tensions occur in places where we operate or in other parts of the country, leading to overall political and economic instability, it could adversely affect our business, results of operations, financial condition, and trading price of our Equity Shares

### ***38. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations may adversely affect our business results of operations, cash flows and financial performance.***

Changes in the operating environment, including changes in tax law, could impact the determination of our tax liabilities for any given tax year. Taxes and other levies imposed by the Government of India that affect our industry include income tax, goods and services tax and other taxes, duties or surcharges introduced from time to time. The tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the Government of India may adversely affect our competitive position and profitability. We cannot assure you that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation, and implementation of any amendment to, or change to governing laws, regulation, or policy in the countries in which we operate may materially and adversely affect our business, results of operations and financial condition. In addition, we may have to incur expenditure to comply with the requirements of any new regulations, which may also materially harm our results of operations. We are also subject to these risks in all our overseas

operations depending on each specific country. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities. As a result, any such changes or interpretations may adversely affect our business, financial condition, and financial performance. Further, changes in capital gains tax or tax on capital market transactions or sale of shares may affect investor returns.

### **Risks relating to the Equity Shares**

***39. Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.***

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renouncee(s) may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncee(s) prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renouncee will not be able to apply in this Issue with respect to such Rights Entitlements.

***40. Our Company will not distribute the Issue Materials to certain overseas Shareholders who have not provided an address in India for service of documents.***

Our Company will dispatch the Issue Materials to such Shareholders who have provided an address in India for the service of documents. The Issue Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e-mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Issue Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions. However, our Company cannot assure you that the regulator would not adopt a different view with respect to compliance with the Companies Act and may subject our Company to fines or penalties.

***41. The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.***

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI ICDR Master Circulars, the credit of Rights Entitlement and Allotment of Rights Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two working days prior to the Issue Closing Date (i.e., on or before February 23, 2024), to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two working days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 3, 2018, issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialised form (except in case of transmission or transposition of Equity Shares).

***42. Any future issuance of the Equity Shares, or convertible securities by our Company may dilute your future shareholding and sales of the Equity Shares by our Promoters or other major shareholders of our Company may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, or convertible securities by our Company, including through exercise of employee stock options or restricted stock units may lead to dilution of your shareholding in our Company, adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. Further,

any future sales of the Equity Shares by the Promoters and members of our Promoter Group, or other major shareholders of our Company may adversely affect the trading price of the Equity Shares.

***43. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of a securities transaction tax (STT), on the sale of any Equity Shares held for more than 12 months at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchanges, the quantum of gains and any available treaty relief. STT will be levied on the seller and/or the purchaser of the Equity Shares and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

Any changes in the Finance Act 2023 or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws that are applicable to our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

***44. You may not receive the Equity Shares that you subscribe in the Issue until approximately fifteen days after the date on which this Issue closes, which will subject you to market risk.***

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

***45. There is no guarantee that our Equity Shares will be listed in a timely manner or at all, and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares.***

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchange until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchange. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future.

Secondary market trading in our Equity Shares may be halted by a stock exchange because of market conditions or other reasons. Additionally, an exchange or market may also close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at a particular point in time.

***46. Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.***

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not

permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

***47. Fluctuations in the exchange rate between the Rupee and other currencies could have an adverse effect on the value of the Equity Shares in those currencies, independent of our results of operations.***

The Rights Equity Shares will be quoted in Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will be paid in Rupees. Any adverse movement in currency exchange rates during the time it takes to undertake such conversion may reduce the net dividend received by investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares, may reduce the net proceeds received by investors. The exchange rate between the Rupee and other currencies has changed substantially in the past and could fluctuate substantially in the future, which may have an adverse effect on the value of our Equity Shares and returns from the Equity Shares in foreign currency terms, independent of our results of operations.

***48. There may not be an active or liquid market for our Equity Shares, which may cause the price of the Equity Shares to fall and may limit your ability to sell the Equity Shares.***

The price at which the Equity Shares will trade after this Issue will be determined by the marketplace and may be influenced by many factors, including:

- our financial results and the financial results of the companies in the businesses we operate in;
- the history of, and the prospects for, our business and the sectors in which we compete;
- the valuation of publicly traded companies that are engaged in business activities similar to us; and
- significant developments in India's economic liberalization and deregulation policies.

In addition, the Indian equity share markets have from time-to-time experienced significant price and volume fluctuations that have affected the market prices for the securities of Indian companies. As a result, investors in the Equity Shares may experience a decrease in the value of the Equity Shares regardless of our operating performance or prospects.

#### Market Overview

The textile industry holds a prominent position in the Indian economy. This industry contributed 4 per cent to the global trade in textiles and apparel, 2 per cent to the national Gross Domestic Product (GDP), more than 12 per cent of the manufacturing sector’s GDP, and 7 per cent of industry output in value.

India’s textile and apparel exports (including handicrafts) stood at \$44.4 billion with an increase of 41 per cent year-on-year (yoy) basis in FY22. Currently, India’s textile industry contributes around 12 per cent to the country’s total exports which was 10.66 per cent in FY 2022. The market size of the global textile industry is around \$869 billion and expected to grow at 3.5 per cent CAGR (compound annual growth rate) to reach \$1000 billion by 2025-26. The growth of the Indian textile industry has been fostered by self-sufficiency by a diverse set of factors. Such factors are ample availability of raw material particularly natural fibres, cheap labour and strong entrepreneurial skills, flexibility in servicing smaller and specialized orders, cultural diversity and rich heritage, and natural demand drivers including rising income levels, increasing urbanization and growth of the disposable income.

The Indian textile industry is the second largest employment provider after agriculture. It is highly labour intensive, and the industry has significantly emerged as a source of income for the unskilled, semi-skilled, and women labour force in the country. It provides livelihood to more than 45 million people directly and more than 60 million people indirectly through its allied industries.

#### Major Segments of the Textile Industry

Indian textile industry is highly diversified and fragmented. The classification of textile industry can be done in two ways:

In terms of production process, the textile industry can broadly be structured as:

- *Organised textile industry:* Further, it can be divided into two segments i.e., spinning mills and composite mills.
- *Unorganised textile industry:* Under the unorganised classification, the segments like power loom, handloom, hosiery, knitting yarn and fabric processing units are major sub-segments.

Both the segments (organised and unorganised) are complementary to each other. For example, the organised sector is the sole producer of yarn, and it is simultaneously used by both the segments i.e., organised, and unorganised textile industry.

In terms of process and output, there are two key segments of textile industry as follows:  
*Process:* Raw material => Ginning => Spinning => Weaving/Knitting => Processing => Garments/Apparel Production.

*Output:* Cotton, jute, silk, wool (raw Materials) => Fibre => Yarn => Fabric => Processing Fabric => Final Garments/Apparel.

As a final product, from the above two broad segments, we get woollen textile, silk textiles, jute textiles, and technical textiles. Textile industry is undergoing a major reorientation towards non clothing applications of textiles, i.e., technical textiles.

### **Raw Material Support**

The raw materials are abundantly available for the Indian textile sector. In terms of raw materials and skilled manpower, India enjoys comparative advantage in cost of production over other global textile producing counterparts. The production of raw materials such as cotton, wool, silk, and jute in abundant quantity provides an edge to the textile manufacturing industries in India.

**Cotton:** Cotton is one of the most important cash crops of the country and it serves as the major source of raw material support to the domestic textile industry. India has emerged as one of the largest producers, consumers, and exporters of cotton in the world. In terms of raw materials needed to produce textile, cotton contributes 60 per cent alone to the raw material basket. It accounts for 25 per cent of the total global fibre production. Every year, about 300 lakh bales (~170 kg each) of cotton are consumed in India.

India has highest acreage production (production per unit of hectare) of cotton in the world. India has 133 lakh hectares of land on which the cotton crops are produced, which constitutes 41 per cent of the world area of 320.54 lakh hectares under cotton cultivation. Around 62 per cent of the total cotton production in India produced on rain-fed areas while rest 38 per cent production is on irrigated lands. During 2020-21, India's productivity was around 460 kg per hectare.

As per the Central Statistics Office data, India produced 40,66,000 tonnes of yarn in 2021-22 against the low base of 32,60,000 tonnes in 2020-21. Cotton production was hard hit by the Covid-19 pandemic. The devastating impact of the pandemic was discernible in the year 2020-21, when the production contracted (- 18.74 per cent) as compared to the previous year. The negative growth continued for two consecutive years, i.e., 2020-21 and 2021-22. This severely impacted the textile industry of the country.

However, the 2021-22 figures show a marginal improvement (y-o-y). But the industry still faced the consequences of low demand due to changing dynamics led by Russia-Ukraine war and looming recession in EU and the USA (United States of America).

India imported 'Foreign Cotton of all Staple Lengths' of value \$ 1,287.61 million during April to December 2022-23 with an increase of 222 per cent from \$ 399.05 million during the same period in the last financial year.

The cotton cultivation increased by 5 per cent to 125.02 lakh hectare as against 119.10 lakh hectare during last year. To encourage mechanized harvesting of cotton, improved quality of cotton and to reduce labour cost, brand named 'Kasturi Cotton India' for Indian cotton was launched.

### Growth of Textile Industries in India

#### Growth of Textile and Apparel Industry

The textile industry and wearing apparel industry have a weightage of 3.3 per cent and 1.3 per cent, respectively in India's overall manufacturing segment. These segments recorded tepid growth as export demand for these products softened in conformity with the decelerating global growth.

The distinctiveness of the textile industry lies in its strength both in the hand-woven sector and in the capital-intensive mill sector. The Indian mill sector is the second largest in the world. Traditional sectors like handloom, handicrafts and small-scale power loom units are the biggest source of employment for millions of people in rural and semi urban area. It provides direct and indirect employment and a source of livelihood for millions of people including many

women and rural population. This sector is aligned well with the Government's key initiatives of *Make in India*, *Skill India*, *Women Empowerment* and *Rural Youth Employment*.

### Status of Textile Processing Industry in India

The textile processing industry reported a strong 18.7 per cent y-o-y growth in its sales revenues during the first quarter, which ended in June 2022. Its operating expenses corresponding to sales rose by 19.5 per cent. Raw materials, the industry's biggest operating expense, rose 22.8 per cent. Consequently, the industry's operating profit rose by 8.9 per cent, which was slower than revenue growth. Operating profit margin declined by 66 bps to 7.3 per cent. While interest declined by 8.8 per cent in non-operating expenses, depreciation remained almost at the previous year level. However, other income declined by 26.1 per cent. Therefore, the net profits of the industry rose by 8.1 per cent. The net profit margin deteriorated to 1.8 per cent in the reporting quarter from 2 per cent in the June 2021 quarter. The industry's June 2022 quarter performance was based on the interim results of 15 companies (CMIE, Industry Outlook). In the last three financial years, the profitability and distribution costs were not favourable for the textile processing industry in India.

### Export & Import of Textile Products

The textile industry of India is one of the largest in the world with vast raw material base and manufacturing capacity across the value chain. India is the 6<sup>th</sup> largest exporter of textiles and apparel in the world. Textiles. The Indian textile export basket consists of a wide range of items exported to over one hundred countries. India's textiles and clothing industry is one of the mainstays of the national economy. The share of textile and apparel (T&A), including handicrafts in India's total exports stood 12 per cent in 2020-21.

India's textiles products, including handlooms and handicrafts, are exported to more than 100 countries. The USA, EU-27 and UK, account for approximately 47 per cent of India's textiles and apparel exports. The Indian textile sector

faced trade deficit due to muted demand for its textiles, economic slowdown together with rising inflation in the west, and the geopolitical tensions between Russia and Ukraine. Despite the unfavourable circumstances, the sector showed resilience and managed to cross the pre-Covid level of textile and allied product exports in 2021-22.

As per the media reports, the textile exports from India are expected to fall 16 to 18 per cent (yoy) in FY23. The textile sector gradually recovered in FY21 and FY22. The overall textile exports from India, however, contracted by 13.4 per cent (yoy) at \$23.1 billion during the April-November 2022 period. The reasons for the persisting modest demand for textile commodities in the domestic as well as in the global market are - a) rising prices of textile products driven by higher raw material and logistic costs, and b) the looming recessionary situation in the USA and European nations.

These issues negatively impact the industry because the USA and some of the European countries are the biggest buyers of Indian textiles. Despite all these difficult circumstances, the domestic demand is expected to pick-up in the second half (H2) of the fiscal year 2023-24 as the sentiment of customers may improve during the festive season later.

The USA is the biggest market for India’s textile and allied products. India exported textiles and allied products of the value \$ 492 million during the fiscal year 2022-23. After the USA, Australia is on the second spot in the list with \$ 277 million exports of textiles and allied products from India followed by Singapore (\$ 122 million), Switzerland (\$ 81 million), and Brazil (\$ 66 million).

## **Institutional Initiatives**

Infrastructure development is one of the seven priorities of the Union Minister of Finance as spelt out in her Union Budget 2023 speech in the Parliament. A sharper focus on better infrastructure for the industrial development would help textile firms to reduce their logistic costs. The main focus of the budget was on enhancing the yield of extra-long staples (ELS) variety of cotton that would help in increasing the production of value-added garments and to reduce imports dependency of ELS cotton. The extension of credit guarantee scheme for MSMEs (Micro, Small, and Medium Enterprises) with an infusion of ₹ 9,000 crore, collateral for ₹ 2 lakh crore loans to MSMEs, effective from April 1, 2023, would also help labour and capital-intensive textile industry to match with growth target of the Indian economy.

As a part of integrating India's international trade of textile, recently the Government of India signed a pact with Australia. The trade pact between India and Australia can play a catalytic role in the growth of the Indian textile industry. *The Economic Cooperation and Trade Agreement* between India and Australia came into effect on December 29, 2022. The two nations' business relations as well as the full range of goods and services are set to profit from this agreement, which is the first trade agreement between India and a developed nation in recent times.

The GoI is promoting technical textile at various platforms. Recently, the Ministry of Textiles is going to organise a flagship event in collaboration with *Federation of Indian Chambers of Commerce Industry (FICCI)* for the purpose of promotion of technical textiles, which includes textiles meant for some specific purposes like medical, defence, industrial, agriculture, automotive, building, packaging textiles, etc.

In order to position India as a global leader in technical textile, the Ministry of Textiles launched the scheme named - National Technical Textiles Mission (NTTM). Under this, an outlay of ₹ 1480 crore was allocated to promote and develop technical textiles sector in India, 74 research proposals valuing ₹ 232 crore were approved in the category of speciality fibre and technical textile. Other steps taken include development of 31 new HSN codes. The Synthetic & Rayon Textiles Export Promotion Council has been assigned the role of export promotional council for technical textiles.

There is another scheme named *Silk Samagra-2*, implemented for three years from 2021-22 to 2025-26 for the development of sericulture industry in the country. Recently, the Government approved the plan of setting up of *seven PM Mega Integrated Textile Region and Apparel (PM MITRA) Parks*. The PM MITRA parks will have integrated large-scale and modern industrial infrastructure facilities for the entire value chain of the textile industry. It will help in reducing not only the logistic costs and improve the competitiveness of Indian textiles but also boost employment generation, attract domestic as well as foreign investment, and position India firmly in the global textile market. The parks are expected to create a total of one lakh direct and two lakh indirect employment.

Other schemes such as SAMARTH- *Scheme for Capacity Building in Textile Sector*, *National Handloom Development Programme*, *Raw Material Supply Scheme*, *National Handicraft Development Programme*, *Comprehensive Handicrafts Cluster Development Scheme*, *Integrated Wool Development Programme*, etc., have been implemented to promote and develop indigenous textile sector.

India has signed 13 Free Trade Agreements (FTAs), including the recently concluded Comprehensive Economic Partnership Agreement with UAE and Economic Cooperation and Trade Agreement with Australia, as well as six Preferential Trade Agreements with a variety of trading partners. Keeping in mind the national interest and domestic sensitivities, the Government entered into FTA negotiations with trading partners, such as, the United Kingdom, the European Union, and Canada to increase market access for Indian textiles. The production of knitted clothing is still extremely competitive. Indian textile factories struggle to satisfy capacity demands from global companies that want to buy what they need from just two or three suppliers.

## Foreign Direct Investment

The Government of India has taken several steps to modernize the textile industry, enhance exports and to promote FDI in textile sector on a pan-India basis. The Union Minister of State for Textiles in a written reply to a question in Lok Sabha in December 2022, informed that FDI in the textile sector from 2017-2022 was \$ 1522.23 million. Over the years, India has put liberal and transparent investor-friendly Foreign Direct Investment (FDI) policy in place. There is 100 per cent FDI allowed in the textile sector under the automatic route. As per a survey report by the Confederation of Indian Textile Industry (CITI), the textile sector recorded private investment of about ₹ 10,000 crore in first half of 2022-23 (i.e., April 2022 to September 2022). But the investment slowed down to around ₹ 7,000 crore in second half of the current fiscal.

## Industry Risks

The steady growth of the textile industry is hampered by obsolete machinery and the consequent need for modernization, low productivity and high cost of production, insufficient availability of quality cotton and ineffective implementation of the Scrapping policy. There are also issues of multi-layered issues involved in Quality Control Orders (QCO), negative impact of the cost of certification on sustainability, traceability and circularity, sickness and recession in the mill sector and inadequate incentivization necessitating formulation of the National Textile Policy.

New capacity additions in the cloth industry declined in the last four years. Project completions dropped from ₹ 4.45 billion in 2017-18 to ₹ 1.8 billion in 2018-19. It further dropped to ₹ 1 billion in 2019-20 and further to ₹ 415 million in 2020-21. The industry did not commission any new production capacities in 2021- 22. Barring a couple of years, the project completions in the industry never dropped below ₹ 3 billion since 1995-96. Cloth companies on an average commissioned projects worth over ₹ 8 billion in each of the years during 1995-2018 (CMIE, Industry outlook). Textile mills in India, when compared to their counterparts in other parts of the world, operate for highest number of working days (357) in a year, despite several public and gazetted holidays.

The survey tabled in Parliament by Finance Minister Smt. Nirmala Sitharaman on January 31, 2023, showed tepid growth in manufacturing industries like textiles, apparel, and leather. At present, the domestic production of textile industry turned sluggish because of higher input cost and cheaper garment imports. However, the sector showed resilience and recovered from the Covid-19 pandemic slump. Since, March 2022, the Index of Industrial Production (IIP) has consistently decreased. The IIP value decreased from 118.5 in March 2022 to 102.3 in October 2022. Also, on a cumulative basis from April to October 2022, the IIP value is lower than the corresponding period in 2021. The sector could not regain the level of production level achieved prior to the pandemic (see Table 6). Stagnant or declining production across the value chain, leveraging of Free Trade Agreements by Bangladesh, Vietnam, etc. to increase their export share, lack of Preferential Trade Agreements with key importers and longer lead time and high reliance on imports for almost all textile machinery causes concern. These and other issues need to be addressed speedily and effectively to enhance India's global competitiveness on a sustained basis.

## Way Forward

The position of the textile industry in India can be understood by Porter's Five Forces model. The Five Forces model is named after Harvard Business School professor Michael E. Porter. Porter's 5 forces are:

- Competition in the industry
- Potential of new entrants into the industry
- Power of suppliers
- Power of customers
- Threat of substitute products

Considered in a historical perspective, the issues of high production costs, un-friendly labour law, logistic disadvantages, rising transaction cost, declining in mill sector, globalization have beleaguered the textile industry in

India. Rising inflation, Russia Ukraine war, geo-political disruptions, high energy prices, and depressed customer sentiments in the United States, Europe and other big markets resulted in declining growth rates in the second half (H2) of 2022. Most of the top companies, including Welspun, Vardhman, Arvind, Trident, KPR Mills, Indo Count, RSWM, Filatex, Nahar Spg, and Indorama in the textile sector witnessed an increase in cotton and yarn prices, leading to a demand drop of at least 10 per cent, so far, during the beginning of the FY23. The price of cotton in India more than doubled to cross ₹ 100,000 per candy during the current financial year, leading to an increase in yarn prices too. With persisting fears of the downturn caused, *inter-alia*, by higher domestic cotton prices and other costs, sluggish overseas orders, rising interest rates on bank loans and higher labour costs, the industry bodies have approached the Government seeking a ban on the futures trading of cotton and restrictions on cotton and yarn exports.

The Indian economy is better positioned and is outperforming major economies of the world. The globally synchronized deceleration stemmed from geopolitical headwinds, which impacted Europe, United States, and other big markets severely where the consumers cut their spending on cloths and apparel. It is expected that the slowdown would continue this year and the risk of layoff is imminent in the textile industry triggered by livelihoods of over 45 million people.

While the textile value chain is well-developed in India, the Indian textile industry is constrained by the conspicuous absence of the economies of scale. Automation and digitization are the core areas the Indian textile industry needs to go to scale and achieve efficiency in the process.

The Indian textile industry should take benefits out of the leverages Government is providing through support schemes like PLI, PM MITRA, Export incentives, setting-up of *Seven Pradhan Mantri Mega Integrated Textile Region and Apparel (PM MITRA) Parks* by the Government in Greenfield/Brownfield sites with an outlay of ₹ 4,445 crore for a period of seven years up to 2027-28 that may produce better results in coming years for the industry.

Further, the Indian technical textiles market has a lot of potential to grow and compete in the global markets. In order to improve this segment, there is a need to set some standards that can promote the technical textiles industry and ensure quality checks for the sector in consultation with the domestic industry in India. Standard quality norms together with the entry of large global retailers, enhanced capacities across the value chain, right investment incentives, competitive cost of capital and matching logistics infrastructure and free trade agreement with select large countries will provide an impetus to this industry, which has significant multiplier effects and high employment intensity. Tailwinds include strong domestic textile market, rapid expansion of the retail sector, the availability of quality cotton; besides presence of spinning, weaving, processing units, viscose, and polyester fibre mills across industrial clusters, the China Plus one sourcing strategy, the government's accent on textiles and investments.

In sum, modernization and effective use of technology is a pre-requisite to the growth and structural transformation of the textile industry in India.

## **MANUFACTURING PROCESS**

### **a. For Yarn**

**Mixing:** In the mixing department pre-calculated quantities of different varieties of cotton are blended together to make a particular count.

**Blowing:** Blowing is the process of cleaning mixed cotton. Trash, short fibers, dust, and other foreign matters like seed coats etc. are removed during the blowing process. At this stage, the cotton is opened and made into small tufts and fed to the next process with the help of aerofeed.

**Carding:** After blowing stage, the opened cotton is fed to the carding machines. The card has two major trash cleaning points namely, licker-in and cylinder and flats. The licker-in eliminates motes, short fibers, seed particles, etc. The pre-cleaned cotton tufts are then carded and the fibers are individualized by the slow moving flats and high speed cylinder. The carded fibers are then collected through a trumpet. The loose cotton at this stage gets converted to a sliver.

**Combing:** Combing is done to improve the mean fiber length, lustre, strength, and evenness of yarn. After carding, 26 card slivers are doubled to form a sheet of lap. This lap prepared is fed to the comber machine. Comber machines extract certain percentage of short fibers from the homogeneous lap and the resultant sheet of lap becomes a combed sliver. The Combed sliver is evenner.

**Drawing:** The Combed slivers are fed to drawing machine. This machine mainly parallelizes the combed sliver fiber.

**Simplex:** The gradual reduction of linear density and twist imparted to withstand the stretch during spinning is carried out at this stage by using the Simplex machines. The drawing / combed sliver gets drafted by the four pairs of fluted rollers and synthetic top rollers, running at different speeds to make a bobbin.

**Spinning:** Simplex bobbins are creel in spinning frame. The roving is drafted and twisted by a pair of 3 top rollers over 3 fluted rollers and by a ring and traveller respectively. The twisted yarn is then wound into plastic bobbins. The net yarn content in a bobbin weighs approximately 50 grams. The produced yarn is wound on to cones in Autoconer

and made into yarn cones with a weight of 1.89kgs to 2.57 kgs and then packed in boxes or bags as per the market needs.

The spun yarn is sold in two forms namely, Single Yarn Cone and Double Yarn Cone. For producing Double Yarn Cone, the spun yarn is further processed through Assembly Winding Machines and Two-for-One Twister machines.

**INDEPENDENT AUDITOR'S REPORT  
TO THE MEMBERS OF NAGREEKA EXPORTS LIMITED  
Report on the Audit of the Standalone Financial Statements**

**B. Nath & Co.**

Chartered Accountants

**Opinion**

We have audited the accompanying standalone financial statements of **Nagreeka Exports Limited** ("the Company"), which comprise the Balance Sheet as at March 31, 2023, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year ended on that date, and a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2023, the profit and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

**Basis for Opinion**

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the *Auditor's Responsibilities for the Audit of the Standalone Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the independence requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

**Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matter described below to be the key audit matters to be communicated in our report.

Sr. No.	Key Audit Matter (KAM)	Auditor's Response

2.	<p>Recoverability of unutilized Minimum Alternate Tax (MAT) credits</p> <ul style="list-style-type: none"> <li>• As of March 31, 2023, the Company has recognized MAT credits of Rs.450.94 Lakhs, included under deferred tax assets that can be utilized against future tax liabilities.</li> <li>• The analysis of the recoverability of such deferred tax assets has been identified as a key audit matter because the assessment process involves judgement regarding the future profitability and the likelihood of the realization of these assets, in particular whether there will be taxable profits in future periods that support the recognition of these assets. This requires assumptions regarding future profitability, which is inherently uncertain. Accordingly, the same is considered as a key audit matter</li> </ul>	<p>Our audit procedures included the following: -</p> <ul style="list-style-type: none"> <li>• Obtained and analyzed the future projections estimated by management, assessing the key assumptions used, including the analysis of the consistency of the actual results obtained by the various segments with those projected in the previous year. #### Information Other than the Standalone Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, and Shareholder's Information, but does not include the standalone financial statements and our auditor's report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

## **Responsibilities of Management and Those Charged with Governance for the Standalone Financial Statement**

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are responsible for overseeing the Company's financial reporting process.

## **Auditor's Responsibilities for the Audit of the Standalone Financial Statements**

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence

obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

## **Annexure - A to the Auditors' Report**

### **Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")**

We have audited the internal financial controls over financial reporting of **Nagreeka Exports Limited** ("the Company") as of 31<sup>st</sup> March 2023 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

#### **Management's Responsibility for Internal Financial Controls**

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

#### **Auditors' Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

## Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

## Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

## Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31<sup>st</sup> March 2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

The financial statements have been prepared on historical cost basis, except for financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. All pre-operative expenses incurred on Capital Work in Progress allocated to related fixed assets on Pro-rata Basis.

### 2.4) Depreciation and amortisation of property, plant and equipment and intangible assets

- i) Depreciation on fixed assets is provided on depreciable value of assets using straight-line method on the basis of useful life specified in Schedule II to the Companies Act, 2013.
- ii) Lease Hold Land is being amortized over the lease period.
- iii) Intangible assets (computer softwares) are amortised on straight-line method at the rates determined based on estimated useful lives.

### 2.5) Impairment

The company assesses at each balance sheet date whether there is any indication that an asset may be impaired. If any such indication exists, the Company estimates the recoverable amount of the assets. If such recoverable amount of the assets or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the profit and loss account. If at the balance sheet date there is an indication that if a previously assessed impairment loss no longer exists, the recoverable amount is reassessed and the asset is reflected at the recoverable amount.

### 2.6) Financial instruments

# NAGREEKA EXPORTS LIMITED

## NOTES TO THE FINANCIAL STATEMENTS for the Year ended 31st March, 2023.

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit and loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability. The transaction costs directly attributable to the acquisition of financial assets and financial liabilities at fair value through profit and loss are immediately recognised in the statement of profit and loss.

### Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial instrument and of allocating interest income or expense over the relevant period. The effective interest rate is the rate that exactly discounts future cash receipts or payments through the expected life of the financial instrument, or where appropriate, a shorter period.

### i) Financial assets

#### Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

#### Financial assets measured at fair value

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business model whose objective is to hold these assets in order to collect contractual cash flows or to sell these financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The Company in respect of equity investments (other than in subsidiaries, associates and joint ventures) which are not held for trading has made an irrevocable election to present in other comprehensive income subsequent changes in the fair value of such equity instruments. Such an election is made by the Company on an instrument by instrument basis at the time of initial recognition of such equity investments.

Financial asset not measured at amortised cost or at fair value through other comprehensive income is carried at fair value through the statement of profit and loss.

### Impairment of financial assets

In accordance with Ind AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets:

- Financial assets that are debt instruments, and are measured at amortised cost e.g., loans, debt securities, deposits and trade receivables
- Financial assets that are debt instruments and are measured as at FVTOCI
- Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 18

The Company follows 'simplified approach' for recognition of impairment loss allowance on trade receivables. The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, the Company reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date. ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cashflows that the entity expects to receive (i.e., all cash shortfalls), discounted at the original EIR.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the statement of profit and loss. This amount is reflected under the head 'other expenses' in the statement of profit and loss. The balance sheet presentation for various financial instruments is described below:

# NAGREEKA EXPORTS LIMITED

## NOTES TO THE FINANCIAL STATEMENTS for the Year ended 31st March, 2023.

Financial assets measured as at amortised cost: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.

Debt instruments measured at FVTOCI: Since financial assets are already reflected at fair value, impairment allowance is not further reduced from its value. Rather, ECL amount is presented as 'accumulated impairment amount' in the OCI.

For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

### Derecognition of financial assets

The Company de-recognises a financial asset only when the contractual rights to the cash flows from the asset expire, or it transfers the financial asset and substantially all risks and rewards of ownership of the asset to another entity.

If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the assets and an associated liability for amounts it may have to pay.

If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

### ii) Financial liabilities and equity instruments

#### Classification as debt or equity

Financial liabilities and equity instruments issued by the Company are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

#### Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equity instruments are recorded at the proceeds received, net of direct issue costs.

#### Financial Liabilities

Trade and other payables are initially measured at fair value, net of transaction costs, and are subsequently measured at amortised cost, using the effective interest rate method where the time value of money is significant.

Interest bearing bank loans, overdrafts and issued debt are initially measured at fair value and are subsequently measured at amortised cost using the effective interest rate method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in the statement of profit and loss.

#### Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or they expire.

#### Derivative financial instruments

In the ordinary course of business, the Company uses certain derivative financial instruments to reduce business risks which arise from its exposure to foreign exchange and interest rate fluctuations. The instruments are confined principally to forward foreign exchange contracts and interest rate swaps. The instruments are employed as hedges of transactions included in the financial statements or for highly probable forecast transactions/firm contractual commitments.

Derivatives are initially accounted for and measured at fair value from the date the derivative contract is entered into and are subsequently re-measured to their fair value at the end of each reporting period.

### 2.7) Cash Flow

Cash Flows are reported using Indirect Method, where by profit / (Loss) before extraordinary items and its tax is adjusted for the effects of transaction of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flow from operating, investing and financing activities of the company is segregated based on the available information.

### 2.8) Valuation of Inventories

**Raw Materials** : Valued at Cost or Net Realisable Value whichever is lower (Cost is computed using "Weighted Average Cost Method").

**Work-in-Progress** : Valued at Cost or Net Realisable Value whichever is lower (Cost includes material Cost plus appropriate share of overhead) (Cost is computed Using "Weighted Average Cost Method").

At the end of each reporting period, monetary items denominated in foreign currencies are re-translated at the rates prevailing at the end of the reporting period. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not translated.

Exchange differences arising on translation of long term foreign currency monetary items recognised in the financial statements before the beginning of the first Ind AS financial reporting period in respect of which the Company has elected to recognise such exchange differences in equity or as part of cost of assets as allowed under Ind AS 101-“First time adoption of Indian Accounting Standard” are recognised directly in equity or added/deducted to/ from the cost of assets as the case may be. Such exchange differences recognised in equity or as part of cost of assets is recognised in the statement of profit and loss on a systematic basis.

Exchange differences arising on the retranslation or settlement of other monetary items are included in the statement of profit and loss for the period.

### 2.16) Critical accounting judgment and estimates

The preparation of the financial statements require the use of accounting estimates which, by definition, will seldom equal the actual result. Management also needs to exercise judgment in applying the Company's accounting policies.

This note provides an overview of the areas that involved a high degree of judgment or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgments is included in relevant notes together with information about the basis of calculation for each affected line item in the financial statements

### Critical estimates and judgments

The areas involving critical estimates and judgments are:

#### i) Taxation

The Company is engaged in manufacturing & Trading activities and also subject to tax liability under MAT provisions. Significant judgment is involved in determining the tax liability for the Company. Also there are many transactions and calculations during the ordinary course of business for which the ultimate tax determination is uncertain. Further judgment is involved in determining the deferred tax position on the balance sheet date.

#### ii) Depreciation and amortisation

Depreciation and amortisation is based on management estimates of the future useful lives of the property, plant and equipment and intangible assets. Estimates may change due to technological developments, competition, changes in market conditions and other factors and may result in changes in the estimated useful life and in the depreciation and amortisation charges.

#### iii) Employee Benefits

The present value of the defined benefit obligations and long term employee benefits depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact the carrying amount of defined benefit obligations.

The Company determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the obligations. In determining the appropriate discount rate, the Company considers the interest rates of Government securities that have terms to maturity approximating the terms of the related defined benefit obligation. Other key assumptions for obligations are based in part on current market conditions.

#### iv) Provisions and Contingencies

Provisions and contingencies are based on Management's best estimate of the liabilities based on the facts known at the balance sheet date.

### 2.17) Onerous contracts

A provision for onerous contracts is recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Company recognises any impairment loss on the assets associated with that contract.

### 2.18) Cash and Cash Equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the balance sheet.

### 2.19) Earnings Per Share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

a) Defined Contribution Plan

(Rs in Lakhs)

Particulars	For the FY Ended 31st March 2023	For the FY Ended 31st March, 2022
Employer's Contribution to Provident Fund	112.26	115.06
Employee's Contribution to Provident Fund	109.30	115.84

b) Defined Benefit Plan - Gratuity

The Gratuity scheme is a final salary defined benefit plan, that provides for lumpsum payment at the time of separation; based on scheme rules, the benefits are calculated on the basis of last drawn salary and the period of service at the time of separation and paid as lumpsum. There is a vesting period of 5 years.

**Associated Risks :**

The design entails the following risks that affect the liabilities and cash flows:

**Interest Rates Risk:**

The defined benefit obligation calculated uses a discount rate based on government bonds. If bond yield fall, the defined benefit obligation will tend to increase. Thus the plan exposes the Company to the risk of fall in interest rates. Some times, the fall can be permanent, due to a paradigm shift in interest rate scenarios because of economic or fiscal reasons. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in the value of the liability (as shown in financial statements). Even for funded schemes, a paradigm downward shift in bond yields may affect the reinvestment yields and may increase ultimate costs.

**Salary Inflation Risk:**

The present value of the defined benefit plan is calculated with the assumption of salary escalation rate(SER), which is applied to find the salary of plan participants in future, at the time of separation Higher than expected increase in salary will increase the defined benefit obligation and will have an exponential effect.

**Demographic risks:**

This is the risk of volatility of results due to unexpected nature of documents that include mortality attrition, disability and retirement. The effects of these decrement on the DBO depends upon the combination salary increase discount rate, and vesting criteria and therefore not very straight forward. It is important and not to overstate withdrawal rate because the cost of retirement benefit of a short caring employees will be less compares to long service employees.

**Assets Liability Mismatch:**

This will come into play unless the funds are invested with a term of the assets replicating the terms of the liability.

**Fair value hierarchy:**

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at the measurement date;

Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

Level 3 inputs are unobservable inputs for the asset or liability.

The investments included in Level 2 of fair value hierarchy have been valued using quotes available for similar assets and liabilities in the active market. The investments included in Level 3 of fair value hierarchy have been valued using the cost approach to arrive at their fair value. The cost of unquoted investments approximate the fair value because there is a range of possible fair value measurements and the cost represents estimate of fair value within that range.

The following table summarises financial assets and liabilities measured at fair value on a recurring basis and financial assets that are not measured at fair value on a recurring basis (but fair value disclosure are required).

## Restrictions on Foreign Ownership of Indian Securities

The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government

of India (“**DPIIT**”) makes policy announcements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEMA. The DPIIT also issues the Consolidated Foreign Direct Investment Policy (“**FDI Policy**”) from time to time. The regulatory framework pertaining to foreign investment, over a period of time, thus, consists of acts, regulations, master circulars, press notes, press releases, and clarifications among other amendments.

India’s current FDI Policy issued by the DPIIT with effect from October 15, 2020, consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT till October 15, 2020. In terms of the FDI Policy, Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the nonresident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI. As per Regulation 7 of the Foreign Exchange Management (Non-debt Instruments) Rules, 2019, the RBI has given general permission to Indian companies to issue securities on rights basis to non-resident shareholders including additional securities under the rights issue. Further, as per the Master Direction on Foreign Investment in India dated January 4, 2018, as amended, issued by the RBI, non-residents may, inter alia, (i) subscribe for additional securities over and above their rights entitlement; (ii) renounce the securities offered to them either in full or part thereof in favour of a person named by them; or (iii) apply for the securities renounced in their favour. Applications received from NRIs and non-residents for allotment of Rights Equity Shares shall be inter alia, subject to the conditions imposed from time to time by the RBI under the FEMA in the matter of refund of Application Money, Allotment of Rights Equity Shares and issue of Allotment advice. If an NR or NRI Investor has specific approval from the RBI, in connection with their shareholding, they should enclose a copy of such approval with the Application. Our Board may at its absolute discretion, agree to such terms and conditions as may be stipulated by RBI while approving the allotment of Rights Equity Shares.

The Rights Equity Shares purchased by non- residents shall be subject to the same conditions including restrictions in regard to the repatriation as are applicable to the original Equity Shares against which Rights Equity Shares are issued on rights basis. The above information is given for the benefit of the Investors. Our Company is not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Letter of Offer. Investors are advised to make their independent investigations and ensure that the number of Rights Equity Shares applied for do not exceed the applicable limits under laws or regulations.
